TECHNICAL SKILLS

Programing Languages

- JavaScript
- TypeScript
- Python
- PHP
- DART
- JAVA

Frameworks

- Laravel
- Tailwind CSS
- Django
- Flutter
- React JS
- Next JS
- Strapi
- FastAPI
- Vue JS

AI & Data

- TensorFlow
- PyTorch
- Scikit-learn
- Generative models.

DevOps & Tools

- Docker
- Azure DevOps
- Git
- Power Platform

Work experience

Lead Product Engineer & Senior Software Engineer

Since Mar. 2026 (7 months)

Walumo, Nairobi, NA, Kenya

- **Complete redesign of the Talent Pro HR application:** Designed a robust architecture from scratch integrating 5 levels of user access rights. Drastically reduced the development cycle (delivered in 5 months compared to 3 years for the previous version) in close collaboration with the Senior Product Manager.
- Applied Agile methodologies (micro-sprints) and critical path analysis to guarantee delivery deadlines.
- Resolved critical technical incidents and optimized performance (e.g., fixed the ATS hydration flow for international users).

Full-Stack Developer & Artificial Intelligence Engineer

Since Mar. 2025 (1 year ½)

ITM HOLDING, Kinshasa, KN, Democratic Republic of the Congo

- Designed and integrated artificial intelligence models into various internal company applications.
- Created and maintained integration pipelines using Azure DevOps.
- Developed and automated applications via Power Platform and Power Automate.

Web & Mobile Developer / Web Designer

From Sept. 2024 to Jan. 2025 (4 months)

ILLUMINATION Metaverse, Kinshasa, KN, Democratic Republic of the Congo

- Designed, developed, and deployed custom applications tailored to business needs.
- Improved user interface and experience (UI/UX) and maintained existing features.

Full-Stack Developer

From Feb. 2024 to Sept. 2024 (7 months)

Orange RDC, Kinshasa, KN, Democratic Republic of the Congo

- **Development of internal and consumer solutions:** Made a major contribution to the frontend engineering of the **Maxit** application.
- Designed and deployed the management platform for the ODC (Orange Digital Center).
- Developed a digitalized vehicle requisition system to optimize internal logistical resources.

Full-Stack Developer

From Feb. 2023 to July 2023 (5 months)

Société Nationale d'Électricité (SNEL), Kinshasa, KN, Democratic Republic of the Congo

- **Creation of critical business solutions:** End-to-end design and implementation of the official software used for registering new SNEL customers.
- **Technical co-leadership:** Developed the seal management system in direct collaboration with the company's Lead Developer.

Software Tester

Since Mar. 2021 (5 years ½)

Utest, Online

- Conducted functional testing and quality assurance on various web and mobile applications.
